

**Sunday 2nd April 2010 at 22:0 / 10pm BST**

**Look low towards the north for the bright stars of Deneb in the constellation of Cygnus (The Swan) and Vega in the constellation of Lyra (The Lyra).**

**Vega is the fifth brightest star in the sky, it is a blue-white star.**

**Deneb is the brightest in Cygnus, it is a blue-white star but Vega is more brilliant brighter than Deneb.**
